

## YSU Open Wireless Quick-Connect Guide

Mac OS X 10.1, 10.2, 10.3 and 10.4

### Required Items:

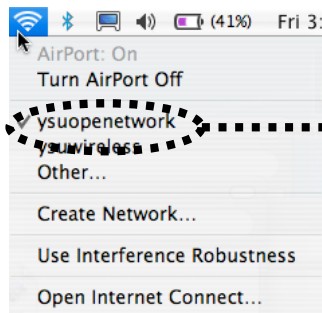

- Mac OS X 10.1.4 or newer
- Apple AirPort, AirPort Extreme or Apple compatible 802.11b, g, b/g, or a/b/g wireless radio

**Step 1:** Walk within range of the YSU Open Wireless System.

\*Range is anywhere within approximately 100 feet of a wireless-enabled building. Range will vary with radio.

**Step 2:** Locate and click on your AirPort Client in the Apple toolbar.

**Step 3:** Select the 'ysuopennetwork' from the broadcast list.

\*Note: If you do not see a broadcast list, you are too far away from a wireless access point or your AirPort software is likely turned off.

**Step 4:** Open your favorite web browser.

\*Notice: Microsoft has discontinued development of Internet Explorer for Mac OS X. In order to prevent security problems we recommend using an alternative browser.
